

The Israeli Aggression on Gaza Strip and the West Bank Situation Report (No. 110)

Covers the period from 22nd to 28th December 2025

Introduction

Since October 7, 2023, the Israeli occupation has waged a genocidal war on the Gaza Strip, blatantly violating international law, including the 1948 Genocide Convention, which obligates state parties to pursue the enforcement of its prohibition. This onslaught has claimed tens of thousands of lives and left many more wounded.

Israeli occupation forces have blatantly violated the terms of the temporary ceasefire, resuming genocidal attacks on Gaza's civilian population with even greater intensity. Their renewed aggression has escalated dramatically, causing widespread destruction that has rendered the Strip uninhabitable. At the same time, they continue to enforce a suffocating blockade, starve the population, and forcibly displace thousands.

Meanwhile, the West Bank has seen a sharp escalation in violations, with increased assassinations, mass arrests, and settler attacks backed by the occupation army—part of broader ethnic cleansing and forced displacement policies. This report documents daily scenes in Gaza and the West Bank, highlighting crimes and attacks targeting Palestinians from December 22 to December 28, 2025. It also includes data on the consequences of the genocide since October 7, 2023.

Israeli figures show that Israeli attacks affected at least 311 Palestinians across the occupied Palestinian territories between December 22 and December 28, 2025. The toll includes 13 deaths, 12 in the Gaza Strip and one in the West Bank, as well as 98 injured civilians (53 in Gaza and 45 in the West Bank). Israeli forces also detained 158 Palestinians, all in the West Bank, while rescue teams in Gaza recovered 42 bodies from beneath the rubble after victims had previously been reported missing.

Overall, these incidents impacted approximately 0.00559% of the total population within just seven days, with a daily average of about 44.4 affected individuals, equivalent to roughly 0.00080% of the population per day. The data point to a continued Israeli policy of widespread civilian targeting and an escalation of systematic killing and ethnic cleansing practices across the occupied Palestinian territories.

The reporting period also saw a notable escalation in attacks and continued Israeli violations of the October 2025 agreement governing the entry of humanitarian aid and medical supplies. The closure of humanitarian corridors in the Gaza Strip and the tightening of movement restrictions in the West Bank further deepened the catastrophic humanitarian conditions facing Palestinians in both areas.
