

**The Israeli Aggression on  
Gaza Strip and the West Bank  
Situation Report (No. 111)**

**Covers the period from 29<sup>th</sup> to 31<sup>st</sup> December 2025**

# Introduction

Since October 7, 2023, the Israeli occupation has waged a genocidal war on the Gaza Strip, blatantly violating international law, including the 1948 Genocide Convention, which obligates state parties to pursue the enforcement of its prohibition. This onslaught has claimed tens of thousands of lives and left many more wounded.

Israeli occupation forces have blatantly violated the terms of the temporary ceasefire, resuming genocidal attacks on Gaza's civilian population with even greater intensity. Their renewed aggression has escalated dramatically, causing widespread destruction that has rendered the Strip uninhabitable. At the same time, they continue to enforce a suffocating blockade, starve the population, and forcibly displace thousands.

Meanwhile, the West Bank has seen a sharp escalation in violations, with increased assassinations, mass arrests, and settler attacks backed by the occupation army—part of broader ethnic cleansing and forced displacement policies. This report documents daily scenes in Gaza and the West Bank, highlighting crimes and attacks targeting Palestinians from December 29 to December 31, 2025. It also includes data on the consequences of the genocide since October 7, 2023.

## Conclusion Conclusion:<sup>14</sup>

The The population of the Gaza Strip fell to approximately 2.13 million by the end of 2025, marking a decline of about 10.6% compared with the population before October 7, 2023, as a result of the ongoing genocide. Between December 29 and December 31, 2025, Israeli occupation forces launched attacks that killed one Palestinian. During the same period, another Palestinian died from extreme cold, and a third was killed when damaged buildings collapsed, bringing the death toll to three in just three days, around 0.00014% of Gaza's population.

Israeli attacks also injured 13 Palestinians, representing approximately 0.00061% of the population, with a daily average exceeding four injuries. In addition, rescue teams recovered three bodies from under the rubble, accounting for another 0.00014% of the population. These figures underscore the deepening humanitarian catastrophe in Gaza, driven by ongoing aggression, the blockade, severe cold, and the collapse of vital infrastructure.

The population of the West Bank reached approximately 3.43 million by the end of 2025, according to official estimates. Between December 29 and December 31, 2025, Israeli occupation forces assassinated one Palestinian in just three days. During the same period, their attacks

injured 15 Palestinians, accounting for about 0.00044% of the West Bank's population, with a daily average of roughly five injuries.

In addition, Israeli forces arrested 52 Palestinians over the same three-day period, around 0.00152% of the total population, at a daily average of approximately 17 detainees. These figures reflect the continued escalation of Israeli policies and the intensification of violations against civilians across multiple governorates in the West Bank.

<b>Details</b>	<b>Number/Ratio</b>	<b>Data</b>
Number of deaths from December 29 to December 31, 2025	1	<b>Number of deaths</b>
Number of arrests from December 29 to December 31, 2025	52	<b>Number of arrests / prisoners</b>
Number of wounded from December 29 to December 31, 2025	15	<b>Number of wounded</b>
Estimated population of the West Bank for 2025	3.43 million	<b>Total population of the West Bank</b>
The rate of arrest crimes compared to the population of the West Bank	0.00152%	<b>Percentage of arrest crimes relative to the total population</b>
Percentage of wounded compared to the population of the West Bank	0.00044%	<b>Percentage of injured people as a percentage of the total population</b>
Average number of arrests per day from December 29 to December 31, 2025	17	<b>Daily rate of arrests</b>
Daily average number of injured from December 29 to December 31, 2025	5	<b>Daily rate of injuries</b>

These figures show that Israeli attacks affected a total of 84 Palestinians across the occupied Palestinian territories between December 29 and December 31, 2025. During this period, four Palestinians were killed, three in the Gaza Strip and one in the West Bank. In Gaza, Israeli attacks killed one person, extreme cold claimed another life, and collapsing, damaged buildings killed a third. The overall death toll represents approximately 0.00009% of the total population of the occupied Palestinian territories.

Israeli forces also injured 28 Palestinians, 13 in Gaza and 15 in the West Bank, equivalent to about 0.00063% of the population. In the West Bank, Israeli forces arrested 52 Palestinians, representing roughly 0.00152% of the population there. In Gaza, rescue teams recovered three bodies from beneath the rubble of destroyed buildings.

Overall, Israeli actions affected 84 Palestinians in just three days, around 0.0019% of the total population, at a daily average of approximately 28 people, or 0.00063% per day. These figures point to the continuation of an Israeli approach marked by the widespread targeting of civilians and the escalation of systematic killing and ethnic-cleansing policies across the occupied Palestinian territories.

The reporting period also recorded a sharp escalation in attacks and violations, alongside Israel's continued breach of the October 2025 agreement on the entry of humanitarian aid and medical supplies. The closure of humanitarian corridors in the Gaza Strip and tighter restrictions on movement in the West Bank have further worsened the already catastrophic humanitarian conditions facing Palestinians in both areas.
