

**The Israeli Aggression on
Gaza Strip and the West Bank
Situation Report (No. 112)**
Covers the period from 1st to 7th January 2026

Introduction

Since October 7, 2023, the Israeli occupation has waged a genocidal war on the Gaza Strip, blatantly violating international law, including the 1948 Genocide Convention, which obligates state parties to pursue the enforcement of its prohibition. This onslaught has claimed tens of thousands of lives and left many more wounded.

Israeli occupation forces have blatantly violated the terms of the temporary ceasefire, resuming genocidal attacks on Gaza's civilian population with even greater intensity. Their renewed aggression has escalated dramatically, causing widespread destruction that has rendered the Strip uninhabitable. At the same time, they continue to enforce a suffocating blockade, starve the population, and forcibly displace thousands.

Meanwhile, the West Bank has seen a sharp escalation in violations, with increased assassinations, mass arrests, and settler attacks backed by the occupation army—part of broader ethnic cleansing and forced displacement policies. This report documents daily scenes in Gaza and the West Bank, highlighting crimes and attacks targeting Palestinians from January 1 to January 7, 2026. It also includes data on the consequences of the genocide since October 7, 2023.

+47746		Number of displaced people

Conclusion:³⁰

The population of the Gaza Strip declined to approximately 2.13 million by the end of 2025, reflecting a decrease of about 10.6% compared with the population before October 7, 2023, as a result of the ongoing genocide. Between January 1 and 7, 2026, Israeli occupation forces carried out attacks that killed 10 Palestinians, accounting for roughly 0.00047% of Gaza's total population, an average of one death per day over just seven days.

During the same period, Israeli attacks injured 54 Palestinians, representing approximately 0.0025% of the population, with a daily average exceeding seven injuries. Israeli forces also arrested five Palestinians from the Gaza Strip.

These figures highlight the continued deterioration of the humanitarian situation in Gaza, where residents endure ongoing military aggression, a suffocating blockade, severe shortages of basic supplies, and widespread infrastructure collapse under extremely harsh living and health conditions.

population of the West Bank reached approximately 3.43 million by the end of 2025, according to official estimates. Between January 1 and 7, 2026, Israeli occupation forces assassinated one Palestinian. During the same period, Israeli forces injured 49 Palestinians, representing about 0.00143% of the West Bank's population, with a daily average of roughly seven injuries.

In addition, Israeli forces arrested 149 Palestinians over the same seven-day period, accounting for approximately 0.00434% of the total West Bank population, at a daily average of about 21 detainees. These figures reflect the continued escalation of Israeli policies and the intensification of violations against civilians across multiple governorates of the West Bank.

These figures show that Israeli attacks affected a total of 274 Palestinians across the occupied Palestinian territories between January 1 and 7, 2026. During this period, Israeli forces killed 11 Palestinians, 10 in the Gaza Strip and one in the West Bank, representing approximately 0.00018% of the total population, with a daily average of about 1.6 deaths.

Israeli attacks also injured 103 Palestinians, 54 in Gaza and 49 in the West Bank, equivalent to roughly 0.0017% of the population, at a daily average of around 15 injuries. In addition, Israeli forces arrested 154 Palestinians, five in Gaza and 149 in the West Bank, accounting for approximately 0.0025% of the population, with an average of about 22 arrests per day.

During the same period, rescue teams recovered six bodies from beneath the rubble of destroyed buildings in the Gaza Strip, representing about 0.0001% of Gaza's population, at a rate of nearly one body per day. This indicates that additional victims remain trapped under the rubble as a result of ongoing bombardment.

Overall, Israeli actions affected 274 Palestinians in just seven days, around 0.0045% of the total population, at a daily average of approximately 39 people, or 0.00064% per day. These figures point to the continuation of an Israeli approach characterized by the widespread targeting of civilians and the escalation of systematic killing and ethnic-cleansing policies across the occupied Palestinian territories.

The reporting period also saw a marked escalation in attacks and violations, alongside Israel's continued breach of the October 2025 agreement governing the entry of humanitarian aid and medical supplies. The closure of humanitarian corridors in the Gaza Strip and tighter restrictions on movement in the West Bank have further deepened the already catastrophic humanitarian crisis facing Palestinians in both areas.
