

**The Israeli Aggression on  
Gaza Strip and the West Bank  
Situation Report (No. 113)**  
Covers the period from 8<sup>th</sup> to 14<sup>th</sup> January 2026

# Introduction

Since October 7, 2023, the Israeli occupation has waged a genocidal war on the Gaza Strip, blatantly violating international law, including the 1948 Genocide Convention, which obligates state parties to pursue the enforcement of its prohibition. This onslaught has claimed tens of thousands of lives and left many more wounded.

Israeli occupation forces have blatantly violated the terms of the temporary ceasefire, resuming genocidal attacks on Gaza's civilian population with even greater intensity. Their renewed aggression has escalated dramatically, causing widespread destruction that has rendered the Strip uninhabitable. At the same time, they continue to enforce a suffocating blockade, starve the population, and forcibly displace thousands.

Meanwhile, the West Bank has seen a sharp escalation in violations, with increased assassinations, mass arrests, and settler attacks backed by the occupation army—part of broader ethnic cleansing and forced displacement policies. This report documents daily scenes in Gaza and the West Bank, highlighting crimes and attacks targeting Palestinians from January 8 to January 14, 2026. It also includes data on the consequences of the genocide since October 7, 2023.

## Conclusion:<sup>30</sup>

The population of the Gaza Strip fell to approximately 2.13 million by the end of 2025, a decline of about 10.6% from pre October 7, 2023 levels, due to the ongoing genocide.

Between 8 and 14 January 2026, Israeli occupation forces carried out attacks that killed 27 Palestinians, around 0.00127% of Gaza's population, averaging nearly four deaths per day over one week. The attacks also injured 43 Palestinians, or about 0.0020% of the population, with more than six injuries recorded daily.

During the same period, rescue teams recovered the bodies of 21 additional victims from beneath the rubble. These figures underscore the deepening humanitarian catastrophe in Gaza, where residents continue to endure relentless attacks, a suffocating blockade, severe shortages of essential supplies, and the collapse of infrastructure under extremely harsh living and health conditions.

The population of the West Bank reached approximately 3.43 million by the end of 2025, according to official estimates. Between 8 and 14 January 2026, Israeli occupation forces killed one Palestinian, continuing a policy of lethal force and the deliberate targeting of civilians.

During the same period, the forces injured 37 Palestinians—about 0.00108% of the West Bank's population, averaging more than five injuries per day.

Israeli occupation forces also arrested 139 Palestinians during this period, equivalent to approximately 0.00405% of the population, with an average of around 20 arrests per day. These figures reflect an ongoing escalation and a sharp rise in violations against civilians across multiple West Bank governorates.

These statistics show that Israeli attacks affected a total of 273 Palestinians in the occupied Palestinian territories between 8 and 14 January 2026. The attacks killed 28 Palestinians, 27 in the Gaza Strip and one in the West Bank, representing about 0.0010% of the total population, with a daily average of approximately four deaths.

Israeli forces also injured 80 Palestinians during the same period, including 43 in Gaza and 37 in the West Bank. This figure equals roughly 0.0011% of the population, with an average of about 11 injuries per day.

In addition, the Israeli occupation army arrested 144 Palestinians, five in the Gaza Strip and 139 in the West Bank, accounting for about 0.0016% of the population, at an average rate of around 20 detainees per day.

During this period, recovery teams retrieved the bodies of 21 victims from beneath the rubble of destroyed buildings in the Gaza Strip, representing approximately 0.00099% of Gaza's population and averaging nearly three bodies per day. This underscores the likelihood that additional victims remain trapped under the rubble as a result of continued bombardment.

Overall, Israeli actions affected 273 Palestinians during this seven-day period, including those killed, injured, detained, and recovered from rubble, equivalent to about 0.0019% of the total population, with a daily average of roughly 39 people. These figures point to the ongoing targeting of civilians and the continued escalation of violence across the occupied Palestinian territories.
