

**The Israeli Aggression on
Gaza Strip and the West Bank**

Situation Report (No. 119)

Covers the period from 15th to 21st February 2026

Introduction

Since October 7, 2023, the Israeli occupation has waged a genocidal war on the Gaza Strip, blatantly violating international law, including the 1948 Genocide Convention, which obligates state parties to pursue the enforcement of its prohibition. This onslaught has claimed tens of thousands of lives and left many more wounded.

Israeli occupation forces have blatantly violated the terms of the temporary ceasefire, resuming genocidal attacks on Gaza's civilian population with even greater intensity. Their renewed aggression has escalated dramatically, causing widespread destruction that has rendered the Strip uninhabitable. At the same time, they continue to enforce a suffocating blockade, starve the population, and forcibly displace thousands.

Meanwhile, the West Bank has seen a sharp escalation in violations, with increased assassinations, mass arrests, and settler attacks backed by the occupation army—part of broader ethnic cleansing and forced displacement policies. This report documents daily scenes in Gaza and the West Bank, highlighting crimes and attacks targeting Palestinians from February 15 to February 21, 2026. It also includes data on the consequences of the genocide since October 7, 2023.

Conclusion:³⁰

the end of 2025, the population of the Gaza Strip had fallen to approximately 2.13 million, a decline of about 10.6% compared with pre-October 7, 2023 figures, as a result of the ongoing genocide.

Between February 15 and 21, 2026, Israeli occupation forces killed 20 Palestinians in attacks across the Strip, accounting for roughly 0.00094% of the total population, an average of nearly three deaths per day within a single week. The same attacks injured 36 Palestinians, or about 0.0017% of the population, averaging five injuries per day.

During the same period, Israeli forces also arrested two Palestinians.
