It also covers the political and humanitarian repercussions, and the material and human loss suffered by Gaza due to ongoing aggression and siege, compounded by severe restrictions on aid. Additionally, it addresses the ramifications of aggression in the West Bank, where citizens have faced assassinations and arrests by Israeli occupation forces since October 7, 2023.

## 1. Daily Scenes:

### Thursday, April 4, 2024

On the 181st day of the genocide by the occupation army, daily scenes disproved the occupation's claims of safe areas in the Gaza Strip, as bombardments by ground, air, and sea hit multiple locations including Khan Yunis and Abasan in the south, as well as Al-Zawaida, Al-Mughraqa, Al-Maghazi camp, and Deir al-Balah in the central Gaza Strip. The occupation forces continued to target the health system and displaced individuals, with documented artillery shelling near Nasser Hospital and Al-Amal Hospital in Khan Yunis, causing injuries. Additionally, an airstrike targeted a house sheltering displaced people in Rafah's Tal al-Sultan neighborhood.

Meanwhile, the occupation army persisted in its systematic destruction of infrastructure and civilian facilities in the Gaza Strip, with documented demolitions of homes and residential areas in the Al-Amal neighborhood, and the Abasan and Bani Suheila areas, west and east of Khan Yunis Governorate.

In the West Bank, the occupation army continued its policy of systematic killing, including the assassination of a citizen in Ya'bad town, where occupation soldiers and Musta'ribeen units surrounded his house, executed him, and blocked ambulance crews from providing health care for him. This brought the total number of victims in the West Bank to 458 deaths and 4,750 injuries from October 7, 2023, to April 4, 2024.

Situation Report (No. 34) from April 4 to April 13, 2024

On the 182nd day of the genocide, daily scenes exposed the falsity of the occupation's claims of safe areas in the Gaza Strip. Bombardments by ground, air, and sea targeted various locations, including Rafah, Khan Yunis, Batn as-Sameen, and Abasan.

In the south, areas such as Al-Nuseirat, Al-Maghazi, Al-Zawaida, and Deir al-Balah in the central Gaza Strip, along with Beit Hanoun and Sheikh Zayed City in the north, were targeted by bombardments on Friday, April 5, 2024. This further underscored the occupation's false claims of safe zones in Gaza.

The genocide perpetrated by the occupation army in Gaza extended to targeting civilian and residential structures. Documentation revealed the destruction of homes in Khan Yunis and residential towers in Al-Nuseirat, resulting in civilian injuries. Tragically, some individuals were found deceased beneath the rubble, inaccessible to ambulance and civil defense crews due to the relentless targeting.

In the West Bank, the occupation army continued its systematic killing, as evidenced by the assassination of a refugee from Nur Shams camp in Tulkarm. Sniper bullets fired by occupation soldiers surrounding the victim's location resulted in the casualty. This grim incident increased the total number of victims in the West Bank to 459 deaths and 4,750 injuries from October 7, 2023, to April 5, 2024.

### **Saturday, April 13, 2024**

Saturday, April 13, 2024, marked another tragic day as the Israeli occupation army continued to commit massacres throughout the Gaza Strip. Several massacres were documented, resulting in 52 deaths and dozens of wounded by Saturday evening, underscoring the ongoing genocide perpetrated by the Israeli occupation in Gaza.

Situation Report (No. 34) from April 4 to April 13, 2024

The Ministry of Health in Gaza reported 52 fatalities and 95 injuries in the Gaza Strip as of Saturday morning, stemming from five massacres on army against civilians. This brought the 33,686 deaths and 76,309 wounded from October 7, 2023, until April 13, 2024, marking the 190th day of the genocide carried out by the occupation army.

Daily scenes once again refuted the occupation's claims regarding the existence of safe areas in the Gaza Strip. Ground, air, and sea bombardments targeted various areas, including Al-Shati Camp, the Al-Tuffah, Al-Zaytoun, and Al-Shuja'ia neighborhoods in Gaza City, Madinat Al-Zahra, Al-Asra, and Deir al-Balah in the middle of the Strip, Rafah and Khan Yunis in the south, and Sheikh Zayed City in the north.

As part of the genocide committed by the occupation army in the Gaza Strip, places where displaced individuals sought refuge continued to be targeted. A UNRWA school in the new Al-Nuseirat camp in the middle of the Strip, which housed many displaced people, was documented as one such target.

## **2. Political and Humanitarian Repercussions:**

Throughout the period covered by this report, documentation revealed the continued obstruction by occupation authorities of the entry of essential humanitarian supplies into the Gaza Strip. Moreover, they persistently targeted distribution operations and restricted access to the Gaza and North governorates. This has exacerbated and deepened widespread famine, particularly affecting these two governorates, which collectively house at least 300 thousand citizens.

Additionally, investigations have unveiled a grim reality: more than 13,000 Palestinian citizens are missing, presumed to be either buried under rubble, among the deaths in unmarked mass graves or subjected to enforced disappearance in prisons and detention centers operated by the occupation authorities. Shockingly, some have been assassinated within these facilities. The Israeli army has withheld any information regarding the circumstances surrounding these prisoner assassinations.

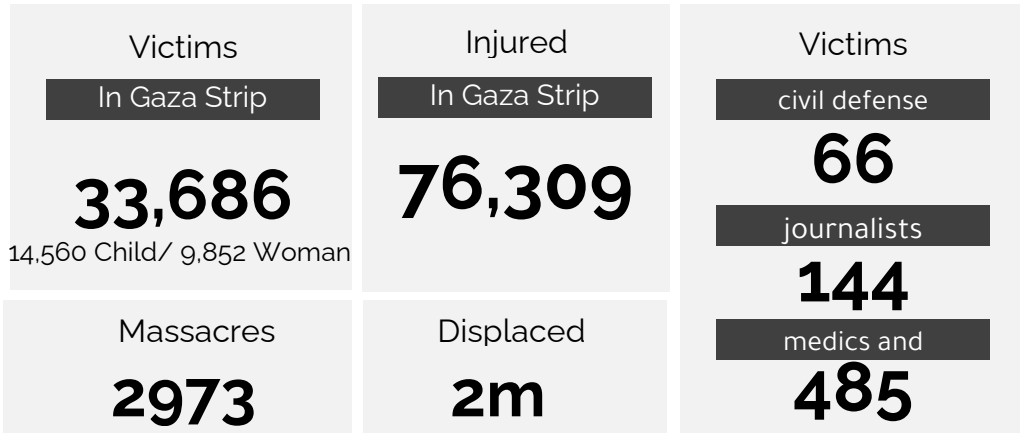

## **3. Human Loss and Material Damage:**

In the Gaza Strip, the toll of human suffering has been staggering. From October 7, 2023, to April 13, 2024, the number of deaths rose to 33,686, a devastating count that includes 14,560 children, with 30 children falling victim to famine. Women, too, have borne a heavy burden, with 9,852 among the deaths. Tragically, 485 medical personnel, 66 civil defense workers, and 144 journalists also

lost their lives. The wounded numbered 76,309, while 7,000 individuals remain missing, with children and women constituting 70% of the missing. Displacement has reached an alarming scale, with 2 million people forced from their homes. Shockingly, the occupation army has

**Human Losses**

been responsible for over 2,973 documented massacres.

In terms of detainment, the period covered by this report saw 310 medical personnel and 20 journalists - whose identities are known - arrested since the ground invasion of the Gaza Strip began on October 27, 2023, bringing the total number of arrests to over 5,000 as of April 13, 2024.

The destruction inflicted upon infrastructure has been catastrophic. The occupation army demolished 171 government buildings, rendered 100 schools and universities completely inoperable, and partially damaged 305 educational institutions. Additionally, 233 mosques were completely demolished, 301 mosques were partially demolished, and three churches were destroyed. Residential units have suffered immensely, with 70,000 homes completely demolished and 290,000 partially destroyed. Furthermore, 200 archaeological and heritage sites fell victim to the onslaught, with over 70,000 tons of explosives ravaging the Strip.

Situation Report (No. 34) from April 4 to April 13, 2024

Hospitals and health centers, essential for the well-being of civilians, have been relentlessly targeted. Thirty-two hospitals were put out of service, along with 53 health centers. One hundred fifty-nine health facilities faced attacks that impeded healthcare provision, and 126 ambulances were completely damaged.

The consequences of aid obstruction and the targeting of healthcare facilities are dire. Palestinian citizens face deteriorating health conditions, with 700,000 cases of infectious diseases documented, along with 8,000 cases of viral hepatitis, 10,000 untreated cases of cancer, 60,000 pregnant women lacking healthcare, and 350,000 individuals suffering from chronic diseases.

In the West Bank, the toll is equally harrowing. The number of deaths reached 466, with over 4,750 wounded and 8,088 individuals held captive. Forced displacement continues unabated, with approximately 3,985 displaced individuals and 648 facilities demolished. These figures underscore the grim consequences of the genocide perpetrated by the Israeli occupation in the Gaza Strip from October 7, 2023, to April 13, 2024.
