2. Political and Humanitarian Repercussions:

This report covers a period marked by the documentation of a new method of using humanitarian aid as a tool for genocide in the Gaza Strip. The suspicious role of the waterway established by the United States was highlighted after news and video clips surfaced, showing the dock being used in the military operation on the Al-Nuseirat camp, which resulted in a significant massacre. Following these events, the World Food Program announced it would cease bringing aid into Gaza through the American floating dock due to security concerns.

The collapse of the health system in Gaza has been closely monitored, with nine months of targeting leading to devastating consequences. Over 490 medical staff have been assassinated, 310 arrested, and more than 130 ambulances destroyed. These actions have severely impacted the health services available, contributing to a rise in abortion cases due to a lack of medical services, food shortages, and the psychological stress of constant danger and displacement affecting pregnant women.

Testimonies from Palestinian prisoners recently released from occupation prisons have confirmed ongoing violent torture and inhuman treatment against thousands of Palestinian civilians. These violations include murder, rape, sexual violence, and forced injections with unknown substances that cause unusual effects on the body.

3. Human Loss and Material Damage:
