Regarding displaced populations, an attack by occupation forces was reported involving artillery shells and live bullets fired at tents of displaced individuals in Rafah, resulting in numerous fatalities and injuries. Additionally, in the northern Gaza Strip, a child's death due to malnutrition was documented at Kamal Adwan Hospital.

In the West Bank, the occupation forces continued their systematic killing, including the death of a Palestinian child from the village of Qatana. This raised the total number of victims in the West Bank to 552 deaths and 5,200 wounded from October 7, 2023, to June 22, 2024.

### 2. Political and Humanitarian Repercussions:

The period covered by this report saw a deepening humanitarian crisis in Gaza, where humanitarian aid became a tool of oppression as all crossings were closed for 44 days, barring aid entry until June 22, 2024. This dire situation has doubled the risks to residents' lives, especially affecting children, the sick, and the wounded who struggle to access food and medical care.

Environmental impact assessments reveal that attacks by the occupying forces on residential areas have left Gaza with 39 million tons of rubble, equating to 107 kilograms per square meter. This has led to significant risks of soil, water, and air pollution. Collapsed water and sanitation systems have exacerbated the crisis, with sewage contaminating seas, soil, drinking water, and food sources. The use of munitions and harmful chemicals has further polluted soil and water resources.

In terms of political repercussions, there has been a disturbing escalation in the occupation forces' attacks on displaced persons' tents within designated "safe areas," notably near the Red Cross headquarters in Al-Mawasi Rafah. These assaults have resulted in numerous casualties, marking the fourth massacre of displaced individuals in Al-Mawasi in less than a month. This underscores the occupation's intent to perpetuate acts of genocide and forcibly displace Gaza's population.

### 3. Human Loss and Material Damage:

Data on material and human losses in the Gaza Strip and the West Bank from 10/7/2023 until 6/22/2024, as follows:
