2. Political and Humanitarian Repercussions:

During the period covered by this report, one of the largest forced displacement operations in the Gaza Strip was documented. The occupation forces issued evacuation orders affecting all the eastern neighborhoods of Khan Yunis Governorate, demanding residents of 20 towns and neighborhoods to forcibly evacuate their homes in preparation for an invasion and occupation of these areas.

Additionally, the crimes of the occupation extended beyond forced displacement. New methods were documented where the occupation forces deliberately targeted the displaced and ambushed them through misleading communications that falsely indicated it was safe to return to their homes. These communications were intended to lure displaced persons back, only to assassinate them. This prompted official authorities in the Gaza Strip to warn against heeding such messages.

War crimes against humanity were also documented, including the deliberate targeting of civil defense crews and the use of Palestinian citizens as human shields during military operations throughout the Gaza Strip. Dozens of such cases were recorded. The humanitarian crisis has worsened due to the famine imposed on citizens in the Gaza Strip, especially in the Gaza and northern governorates. This is part of an Israeli-American strategy aimed at starving the population and preventing the entry of aid, including food, medicine, and necessary medical supplies. The use of humanitarian aid as a tool for genocide and political pressure by the occupation authorities and the American administration exacerbates the dire situation.

3. Human Loss and Material Damage:
