## 2. Political and Humanitarian Repercussions:

This report period highlighted the Israeli occupation army's announcement of a large-scale military operation in the northern West Bank, part of a broader and ongoing escalation against Palestinian citizens. This escalation coincides with increasing violence from armed groups associated with settlers, intensifying allegations that Israel is committing serious violations potentially amounting to genocide. These actions are particularly concerning given the deteriorating conditions in the Gaza Strip since October 7, 2023.

Moreover, the West Bank has seen a significant rise in the frequency and severity of Israeli violations in recent months, including killings, raids, and property destruction. There is also documented evidence of Israeli authorities facilitating settler violence against Palestinians, which encompasses killings, threats, destruction of private property, and the theft of agricultural crops.
