2. Political and Humanitarian Repercussions:

During the reporting period, an urgent distress call was issued to save two million displaced people facing severe humanitarian conditions as winter approaches. With 74% of the tents housing displaced individuals rendered unusable, the risk of a looming humanitarian disaster is growing. This crisis is exacerbated by the Israeli occupation's blockade, which prevents the entry of vital tents and essential supplies.

Concerns have also surfaced regarding the Israeli military's use of digital tools, surveillance technologies, and artificial intelligence in its attacks on Gaza. While these tools are meant to estimate civilian presence and identify targets, their reliance on inaccurate data heightens the risk of civilian casualties. This dependence leads to violations of international laws of war and human rights.

3. Human Loss and Material Damage:¹⁶

Data on material and human losses in the Gaza Strip and the West Bank from ¹⁷10/7/2023 to 9/15/2024 was documented as follows:
