2. Political and Humanitarian Repercussions:

During the period covered by this report, the Israeli occupation army was documented destroying hundreds of dunams of farmland in the northern Gaza Strip. This is part of a systematic campaign, ongoing since October 2023, aimed at incapacitating approximately 80% of the agricultural lands in the area. These actions involve either isolating the land in preparation for its illegal annexation to the buffer zone or bulldozing and destroying it. The goal is to impose harsh living conditions on Palestinians, including the devastation of essential resources and the prevention of agricultural production. These actions, in conjunction with the ongoing blockade and restrictions on the entry of food supplies, constitute a clear violation of international law.
