

The Israeli Aggression on Gaza Strip and the West Bank Situation Report (No. 61)

Covers the period from 19th to 24th January 2024

Introduction

Since October 7, 2023, the Israeli occupation has waged a genocidal war on the Gaza Strip, blatantly violating international law, including the 1948 Genocide Convention, which obligates state parties to pursue the enforcement of its prohibition. This onslaught has claimed tens of thousands of lives and left many more wounded.

Despite the temporary ceasefire, the genocide persists under the convention's framework, as the large-scale destruction has turned Gaza uninhabitable. Moreover, repeated violations of the ceasefire agreement continue, deepening the suffering of civilians trapped under siege and systematic devastation.

Meanwhile, the West Bank has seen a sharp escalation in violations, with increased assassinations, mass arrests, and settler attacks backed by the occupation army—part of broader ethnic cleansing and forced displacement policies. This report documents daily scenes in Gaza and the West Bank, highlighting crimes and attacks targeting Palestinians between January 19 and January 24, 2025.

After reviewing the data on the Israeli occupation's attacks and crimes from January 19 to 24, 2025, the table below presents the overall impact of these assaults from October 7, 2023, to January 24, 2025, including the number of deaths, injuries, and displaced people.

Gaza Strip	1.9 million	Number of displaced people
	347	Number of bodies recovered
	47306	Total number of deaths from 10/7/2023 to 1/24/2025
	111483	Total number of injured from 10/7/2023 to 1/24/2025
West Bank	4300	Number of displaced people

	3209	Total number of injured from 1/1/2025 to 24/1/2025

3. Conclusion:

This data confirms that despite the ceasefire agreement, multiple violations have been documented, including ongoing assassinations and destruction in the Gaza Strip.

In addition, the occupation authorities have blocked the entry of essential equipment needed to recover bodies and search for missing persons, in an apparent attempt to conceal the genocide that has unfolded in Gaza for over a year.

Meanwhile, the West Bank has witnessed an unprecedented escalation in attacks, particularly targeting refugee camps in the north, mirroring the crimes of genocide committed in Gaza. These assaults pose a grave threat, as they deliberately target refugees through assassinations, forced displacement, and the destruction of camps—actions that carry serious repercussions for their right to return. Such practices represent a systematic effort to dismantle the Palestinian cause politically and legally, in blatant violation of international laws and conventions that safeguard refugee rights.
