

The Israeli Aggression on Gaza Strip and the West Bank Situation Report (No. 65)

Covers the period from 15th to 21st February 2025

Introduction

Since October 7, 2023, the Israeli occupation has waged a genocidal war on the Gaza Strip, blatantly violating international law, including the 1948 Genocide Convention, which obligates state parties to pursue the enforcement of its prohibition. This onslaught has claimed tens of thousands of lives and left many more wounded.

Despite the temporary ceasefire, the genocide persists under the convention's framework, as the large-scale destruction has turned Gaza uninhabitable. Moreover, repeated violations of the ceasefire agreement continue, deepening the suffering of civilians trapped under siege and systematic devastation.

Meanwhile, the West Bank has seen a sharp escalation in violations, with increased assassinations, mass arrests, and settler attacks backed by the occupation army—part of broader ethnic cleansing and forced displacement policies. This report documents daily scenes in Gaza and the West Bank, highlighting crimes and attacks targeting Palestinians between February 15 and February 21, 2025.

3. Conclusion:

During the reporting period, the occupation army continued to violate the truce agreement in Gaza by targeting civilians, carrying out shootings and shelling across various areas, resulting in deaths and injuries. Residential buildings, particularly in Rafah Governorate, faced further destruction. The occupation also breached provisions of the agreement related to the entry of humanitarian aid and mobile homes.

Meanwhile, efforts to forcibly displace Gaza's residents intensified, with documented evidence of a body established by the occupation authorities to facilitate this displacement, aligning with the US administration's plan.

In the West Bank, the occupation army intensified its attacks, particularly on the northern region and its refugee camps, causing widespread destruction that altered their landscape and led to further displacement of refugee families. Meanwhile, mass arrests and targeted assassinations continued across the territory, accompanied by a surge in settler violence and the expansion of illegal settlement outposts.

Additionally, the occupation authorities escalated efforts to undermine UNRWA's operations, with new attacks on the agency's headquarters documented during the reporting period.
