

The Israeli Aggression on Gaza Strip and the West Bank Situation Report (No. 68) Covers the period from 8th to 14th March 2025

Introduction

Since October 7, 2023, the Israeli occupation has waged a genocidal war on the Gaza Strip, blatantly violating international law, including the 1948 Genocide Convention, which obligates state parties to pursue the enforcement of its prohibition. This onslaught has claimed tens of thousands of lives and left many more wounded.

Despite the temporary ceasefire, the genocide persists under the convention's framework, as the large-scale destruction has turned Gaza uninhabitable. Moreover, repeated violations of the ceasefire agreement continue, deepening the suffering of civilians trapped under siege and systematic devastation.

Meanwhile, the West Bank has seen a sharp escalation in violations, with increased assassinations, mass arrests, and settler attacks backed by the occupation army–part of broader ethnic cleansing and forced displacement policies. This report documents daily scenes in Gaza and the West Bank, highlighting crimes and attacks targeting Palestinians between March 8, 2025, and March 14, 2025.

3. Conclusion:

During the reporting period, Israeli occupation authorities repeatedly violated the terms of the agreed-upon truce, intensifying the ongoing genocide in the Gaza Strip. They assassinated dozens of civilians, blocked the entry of humanitarian aid, and worsened the humanitarian crisis. Women in Gaza faced severe hardships, including the loss of shelter, food, and access to essential medical care.

In the West Bank, the Israeli military escalated its aggression against refugee camps and accelerated settlement expansion during this period. Settlers intensified their attacks, while occupation authorities carried out land confiscations, demolitions, and forced displacement across the region. They also continued widespread arrest campaigns and targeted Palestinian male and female prisoners with ongoing assaults.³⁰
