

The Israeli Aggression on Gaza Strip and the West Bank Situation Report (No. 70)

Covers the period from 22th to 31st March 2025

Introduction

Since October 7, 2023, the Israeli occupation has waged a genocidal war on the Gaza Strip, blatantly violating international law, including the 1948 Genocide Convention, which obligates state parties to pursue the enforcement of its prohibition. This onslaught has claimed tens of thousands of lives and left many more wounded.

Despite the temporary ceasefire, the genocide persists under the convention's framework, as the large-scale destruction has turned Gaza uninhabitable. Moreover, repeated violations of the ceasefire agreement continue, deepening the suffering of civilians trapped under siege and systematic devastation.

Meanwhile, the West Bank has seen a sharp escalation in violations, with increased assassinations, mass arrests, and settler attacks backed by the occupation army—part of broader ethnic cleansing and forced displacement policies. This report documents daily scenes in Gaza and the West Bank, highlighting crimes and attacks targeting Palestinians between March 22, 2025, and March 31, 2025. It also includes data on the consequences of the genocide since October 7, 2023.

3. Conclusion:

During The Israeli occupation has intensified its ground and air assaults on the Gaza Strip while enforcing forced displacement under the pretext of evacuation orders—escalating its systematic campaign of genocide. These attacks have displaced large segments of the population and destroyed vast swaths of infrastructure and homes. As a result, 85% of residents have lost access to food sources, deepening a crisis that edges closer to famine. The destruction of hundreds of wells and water networks has worsened the health catastrophe, leaving most people without clean water. Meanwhile, authorities have suspended rubble removal and waste management, heightening the risk of a widespread environmental and health disaster. These violations reflect a deliberate policy of forced displacement and growing ethnic cleansing, while the international community continues to shirk its responsibilities.⁴²

In the West Bank, the Israeli occupation army has ramped up its aggression in Palestinian refugee camps across the northern region, targeting infrastructure, bulldozing streets and residential areas, demolishing homes, and forcibly evacuating residents. These actions form part of an intensifying policy of forced displacement. Jenin, Tulkarm, and the Nur Shams refugee camp have seen a sharp escalation on the ground, with increased military reinforcements and a tightening siege on the remaining residents. This has further destabilized the political and humanitarian landscape, deepening the crisis and threatening even harsher living conditions.⁴³
