

**The Israeli Aggression on
Gaza Strip and the West Bank
Situation Report (No. 71)**

Covers the period from 1st to 7th April 2025

Introduction

Since October 7, 2023, the Israeli occupation has waged a genocidal war on the Gaza Strip, blatantly violating international law, including the 1948 Genocide Convention, which obligates state parties to pursue the enforcement of its prohibition. This onslaught has claimed tens of thousands of lives and left many more wounded.

Israeli occupation forces have blatantly violated the terms of the temporary ceasefire, resuming genocidal attacks on Gaza's civilian population with even greater intensity. Their renewed aggression has escalated dramatically, causing widespread destruction that has rendered the Strip uninhabitable. At the same time, they continue to enforce a suffocating blockade, starve the population, and forcibly displace thousands.

Meanwhile, the West Bank has seen a sharp escalation in violations, with increased assassinations, mass arrests, and settler attacks backed by the occupation army—part of broader ethnic cleansing and forced displacement policies. This report documents daily scenes in Gaza and the West Bank, highlighting crimes and attacks targeting Palestinians between April 1, 2025, and April 7, 2025. It also includes data on the consequences of the genocide since October 7, 2023.

3. Conclusion:

During the period covered by this report, the genocide's political and humanitarian impacts became increasingly evident. The Israeli military intensified forced displacement, seized large areas of the Gaza Strip after expelling its residents, and completely demolished buildings to impose a new geographic reality. The report also documents ongoing crimes against journalists, including targeted assassinations and deliberate burnings near Nasser Hospital in Khan Yunis.

In the West Bank, Israeli occupation authorities have intensified their campaign against UNRWA, shutting down more of the agency's schools across several areas, including Jerusalem. This escalation comes alongside aggressive attacks on Palestinian refugees and displaced camps, with little warning about the grave consequences, particularly the threat it poses to the refugee cause and the right of return.
